

Global Tracking Systems

Tracking your people and assets on a global scale

Professional tracking systems to monitor your staff, vehicles and assets anywhere in the world

- Professional trackers
- Leading tracking portal (web and app based)
- SOS functions on trackers
- Overt and covert trackers
- Can be monitored by our 24/7 control room

Our tracking capability is a combination of professional overt and covert trackers linked to a market leading tracking portal, with the tracking portal being accessed via a web-based portal or via the app.

We can provide a range of tracking devices including fully installed permanent vehicle trackers through to covert rapid deployable tracking units. Our trackers can be programmed to suit your specific needs and as standard come with various settings including pursuit mode, flight mode, eco mode, log mode and park mode.

Main benefits:

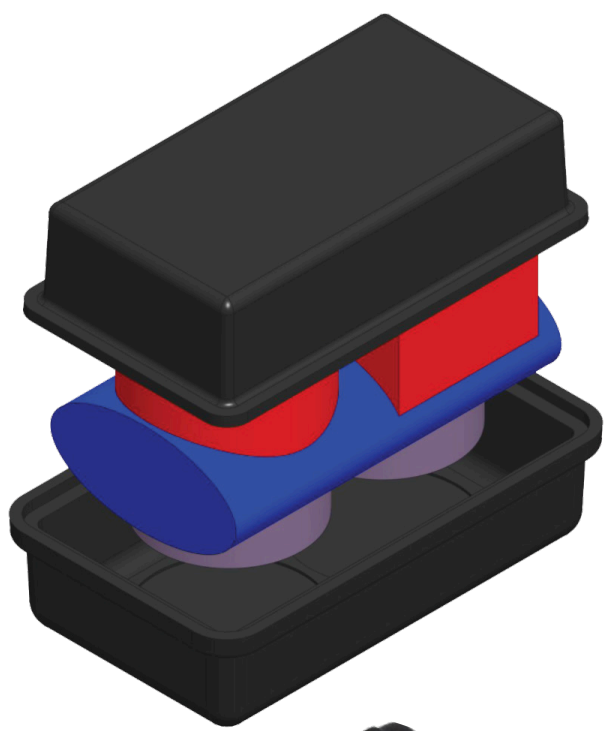

- Duty of care for your staff
- Track your fleet
- Cost effective tracking and reporting
- Professional tracking portal (web and app based)

We can offer a range of tracking devices to suit a variety of needs with each tracking unit having been tried and tested in every environment, from personal tracking units through to vehicle tracking units.

Our tracking units can either be permanently fixed with power or can be attached in seconds using magnets and using battery power. From larger units which provide unrivalled tracking power through to smaller fully enclosed covert trackers, although using our various settings then battery life can be extended on all models meaning an intelligent approach to tracking.

The types of trackers that we can provide:

- Simple installation and maintenance
- ProTEK GPS Tracker and RF receiver
- 3000mAh covert vehicle tracker with magnets
- 6700 mAh vehicle tracker with magnets
- 32000 mAh vehicle tracker with magnets
- GL300W GPS tracker for personal tracking and SOS function
- Teltonika permanent vehicle GPS tracker (mains)
- G7 mini covert asset tracker
- G7 slim covert asset tracker
